Copenhagen climate summit a 'failure': Medvedev

by Staff Writers
Moscow (AFP) Feb 18, 2010

The United Nations climate change summit in Copenhagen was a failure but should serve as a lesson for the future, Russian President Dmitry Medvedev said on Thursday.

"We need to admit that it was a failure... but at the same time it was a lesson. Such events require a different kind of preparation in the future," Medvedev said at a meeting with Russian officials.

He affirmed however that Russia would maintain its previous goal of reducing greenhouse emissions by 25 percent by 2020 relative to 1990 levels.

Medvedev's comments came two months after the Copenhagen summit on climate change, seen even by its supporters as a disappointment and by its critics as a chaotic failure.

Hopes for a binding treaty to halt global warming were dashed when after nearly two weeks of talks, the summit only yielded a general agreement on limiting warming to two degrees Celsius (3.6 degrees Fahrenheit).

The head of the UN's climate change convention, Yan de Boer, announced on Thursday that he was resigning as of July 1.

Climate skeptics exploiting scandal: US envoy

Washington (AFP) Feb 16, 2010

The US pointman on climate change on Tuesday accused vested interests of exploiting scientific scandals and pledged to act even if China and India balk at the controversial Copenhagen accord. Todd Stern, the US special envoy on climate issues, downplayed recent revelations about a landmark 2007 study by the UN's Intergovernmental Panel on Climate Change (IPCC) that warned of dire consequences ... read more
